CS 6301 - Machine Learning Lab Week2

Date: 30.01.23

Spot question

1. Create a KNIME **ETL** (Extract, Transform, Load) flow for **IPL dataset.** (https://www.kaggle.com/datasets/patrickb1912/ipl-complete-dataset-20082020)

2. Blend data from multiple sources (SQL Server, Postgres, MySQL, Snowflake, Redshift, BigQuery, and more).

 Sample ETL flow is given below:
