EX.ON.3

CSS

Batch :Q Date:25.1.25

1. Arrange Your About me Page into Sections

Organize aboutme.html by adding ids, classes, spans and divs. Add "boxes" around these sections of the website by adding to your aboutme.css stylesheet.

- The **borders** are all 5px thick and solid.
- The **colors** are the intuitive HTML color names, e.g. the red border is the HTML color red.
- The heading text in the **red** box should appear on the **right** side of that section of the page.
- The journal entry images should hover on the **right** side next to the surrounding text.

2. Spacing With Padding and Margins, Backgrounds

- The heading text in the **red** box should appear on the **right** side of that section of the page.
- The entry images should hover on the **right** side next to the surrounding text.
- The box with the **green** border should have a background color of white.
- The boxes with the **blue** borders should have a background color of #E8FBFB. It should have a padding of 5px (on all sides) and margin of 10px only on the *top* of the box (the margins for the remaining sides should be left at 0px).
- The **overall page content** area should become centered on the page, should have left and right margins of 10% and a background image using the following image:

3.Practice Float, Alignment and Clear

4. Finishing Touches

- Change the border of the box with the **green** border to be a solid, white, 10px-thick border.
- Change the border of the boxes with the **blue** border to have a solid, 4px-thick border, using the hex value #C2E9E9 for its color.

5. Make three columns using CSS layout. Add header and Footer.
