Java Programming Lab – P Batch

SPOT Exercises **Date : 03.08.2026**

1) Create a BankAccount class where:

   Interest rate is static.

   Balance is instance-specific.

   Display how changing the interest rate affects all accounts.

2) Use the above banking application for the following task:

   Deposit

   Withdraw

   Throw InsufficientBalanceException.

3) Create a thread by extending Thread.Print numbers 1–10 using that thread.

4) Create two threads by implementing Runnable interface. Print odd and even numbers simultaneously using those threads.
