Module 4 - Practical - SPOT

Change the design and implementation of cinema ticket booking system from AWT to SWING

Module 7 - Practical Spot

Spot #1: Socket
Implement
an acknowledgment system where the **server confirms** a successful file
transfer. The server should **send a confirmation message** to the client
once the file is received. The client should **print the confirmation** upon
receiving it.

Spot #2: JDBC
Extend the system to allow students to their department or CGPA using their student ID.
Modify the system to all students from a specific department.
Add a feature to a student record based on their ID.
