SPOT Question – dated 16.07.2025

1. Some websites impose certain rules for passwords. Write a method that checks whether a string is a valid password. Suppose the password rules are as follows:

- A password must have at least ten characters.
- A password consists of only letters and digits.
- A password must contain at least three digits.

Write a program that prompts the user to enter a password and displays Valid Password if the rules are followed or Invalid Password otherwise.
