Compilation & Execution of your Program:

1. Open Command prompt and switch to your working directory where you have stored your lex file (".`l`") and yacc file (".`y`")

2. Let your lex and yacc files be "`hello.l`" and "`hello.y`". Now, follow the preceding steps to compile and run your program.

    1. For Compiling `Lex` file only:

        1. `flex hello.l`
        2. `gcc lex.yy.c`

    2. For Compiling `Lex & Yacc` file both:

        1. `flex hello.l`
        2. `bison -dy hello.y`
        3. `gcc lex.yy.c y.tab.c`

    3. For **Executing** the Program

        1. `a.exe`
