

Passport Automation System

Design a system, where a user can apply for a new passport or renew an older one online or to know any additional information about the old passport is required. If new applicant get the filled in application form from the user. Check whether the attached verification documents are valid. If valid then process the application for passport generation. During the processing of the passport the status of the application can be checked with the application number. The status displays the expected date of issue of the passport and the current processing information.
