

C programming lab questions on 12/11/2024

Topic: Programs using structures

- 1) Write a menu-driven program using structures, where the program should be able to read, display, add and subtract the time. It should make use of two functions, `add_time()` and `subtract_time()`.
- 2) Using structures, write a program to get four cardinal points (x,y) from the user and calculate the Euclidean distance between all of them, and return the pair of points which are the closest to one another.
