

CS6110- OBJECT ORIENTED ANALYSIS AND DESIGN

Answer any 2 questions (2*10=20)

- 1.** What is the Model-View separation principle? Explain the motivation for Model-View separation.
- 2.** Explicate in detail the various testing strategies and the impact of object orientation on testing.
- 3.** Illustrate and provide an interface for creating families of related or dependent objects without specifying their concrete classes using factory method.
